Mechanisms of Ageing and Development
72 (1993) 235–237

mechanisms of ageing and development

Subject index

Acetylcholine, ACh-release and aging, protein kinase C, aging, 119
ACh-release and aging, protein kinase C, acetylcholine, aging, 119
Adaptation to aging, thymic involution, immunological compromises, 49
Adhesion, lymphocyte, endothelium, phorbol myristate acetate, aging, 77
Ageing, longevity, gender gap, 89
Ageing, prefrontal cortex, turnover, biogenic amines, rat, 105
Aging, ACh-release and aging, protein kinase C, acetylcholine, 119
Aging, carcinogenesis, colon cancer, epidemiology, genomic entropy, mortality, 165
Aging, erythrocyte, complement, CR1, 25
Aging, erythrocyte, free-flow electrophoresis, surface charge, 97
Aging, food restriction, lipid peroxidation, lipid composition, thiobarbituric acid, 155
Aging, free radicals, mitochondria, oxidative damage, oxidative stress, life span, 67
Agng, gamma radiation, histones, rat liver, regeneration, 37
Aging, lymphocyte, endothelium, phorbol myristate acetate, adhesion, 77
Aging, protein-free diet, food restriction, immune system, thymus, rats, 183
Aging hormones, cartilage, osteoarthritis, growth factors, collagen, proteoglycans, 213
β-alanine, glycine, cerebral cortex, binding, 57
Allium cepa, selective ribosomal cistron regulation, nucleolar morphology, ethylene, silver nitrate, cobalt chloride, senescence, 199
Arg-Gly-Asp, fibronectin, trabecular meshwork, primary open-angle glaucoma, immunostaining technique, morphometric analysis, 1

Binding, glycine, cerebral cortex, β-alanine, 57
Biogenic amines, prefrontal cortex, turnover, ageing, rat, 105

Calpin, Pk-C, Pk-A, fibroblast, 13
Carcinogenesis, aging, colon cancer, epidemiology, genomic entropy, mortality, 165
Cartilage, osteoarthritis, aging hormones, growth factors, collagen, proteoglycans, 213
Cell culture, sexual dimorphism, TIDA neuron, lactotrope, immunocytochemistry, densitometry, RHPA, 129
Cerebral cortex, glycine, binding, β-alanine, 57
Cerebrospinal fluid, primary anorexia of aging, interleukin-1β, tumor necrosis factor α, plasma, 145
Cobalt chloride, *Allium cepa*, selective ribosomal cistron regulation, nucleolar morphology, ethylene, silver nitrate, senescence, 199
Collagen, cartilage, osteoarthritis, aging hormones, growth factors, proteoglycans, 213
Colon cancer, aging, carcinogenesis, epidemiology, genomic entropy, mortality, 165
Complement, erythrocyte, aging, CR1, 25
CR1, erythrocyte, aging, complement, 25

Densitometry, sexual dimorphism, TIDA neuron, lactotrope, immunocytochemistry, RHPA, cell culture, 129

Endothelium, lymphocyte, phorbol myristate acetate, adhesion, aging, 77
Epidemiolog, aging, carcinogenesis, colon cancer, genomic entropy, mortality, 165
Erythrocyte, aging, complement, CR1, 25
Erythrocyte, aging, free-flow electrophoresis, surface charge, 97
Ethylene, *Allium cepa*, selective ribosomal cistron regulation, nucleolar morphology, silver nitrate, cobalt chloride, senescence, 199

Fibroblast, calpin, Pk-C, Pk-A, 13
Fibronectin, Arg-Gly-Asp, trabecular meshwork, primary open-angle glaucoma, immunostaining technique, morphometric analysis, 1
Food restriction, aging, lipid peroxidation, lipid composition, thiobarbituric acid, 155
Food restriction, protein-free diet, aging, immune system, thymus, rats, 183
Free radicals, aging, mitochondria, oxidative damage, oxidative stress, life span, 67

SSDI 0047-6374(93)01433-M

Free-flow electrophoresis, erythrocyte, aging, surface charge, 97

Gamma radiation, aging, histones, rat liver, regeneration, 37
Gender gap, ageing, longevity, 89
Genomic entropy, aging, carcinogenesis, colon cancer, epidemiology, mortality, 165
Glycine, cerebral cortex, binding, β-alanine, 57
Growth factors, cartilage, osteoarthritis, aging hormones, collagen, proteoglycans, 213

Histones, aging, gamma radiation, rat liver, regeneration, 37

Immune system, protein-free diet, food restriction, aging, thymus, rats, 183
Immunocytochemistry, sexual dimorphism, TIDA neuron, lactotrope, densitometry, RHPA, cell culture, 129
Immunological compromises, thymic involution, adaptation to aging, 49
Immunostaining technique, Arg-Gly-Asp, fibronectin, trabecular meshwork, primary open-angle glaucoma, morphometric analysis, 1
Interleukin-1β, primary anorexia of aging, tumor necrosis factor α, plasma, cerebrospinal fluid, 145

Lactotrope, sexual dimorphism, TIDA neuron, immunocytochemistry, densitometry, RHPA, cell culture, 129
Life span, free radicals, aging, mitochondria, oxidative damage, oxidative stress, 67
Lipid composition, aging, food restriction, lipid peroxidation, thiobarbituric acid, 155
Lipid peroxidation, aging, food restriction, lipid composition, thiobarbituric acid, 155
Longevity, ageing, gender gap, 89
Lymphocyte, endothelium, phorbol myristate acetate, adhesion, aging, 77

Mitochondria, free radicals, aging, oxidative damage, oxidative stress, life span, 67
Morphometric analysis, Arg-Gly-Asp, fibronectin, trabecular meshwork, primary open-angle glaucoma, immunostaining technique, 1
Mortality, aging, carcinogenesis, colon cancer, epidemiology, genomic entropy, 165

Nucleolar morphology, *Allium cepa*, selective ribosomal cistron regulation, ethylene, silver nitrate, cobalt chloride, senescence, 199

Osteoarthritis, cartilage, aging hormones, growth factors, collagen, proteoglycans, 213
Oxidative damage, free radicals, aging, mitochondria, oxidative stress, life span, 67
Oxidative stress, free radicals, aging, mitochondria, oxidative damage, life span, 67

Phorbol myristate acetate, lymphocyte, endothelium, adhesion, aging, 77
Pk-A, calpin, Pk-C, fibroblast, 13
Pk-C, calpin, Pk-A, fibroblast, 13
Plasma, primary anorexia of aging, interleukin-1β, tumor necrosis factor α, cerebrospinal fluid, 145
Prefrontal cortex, turnover, biogenic amines, ageing, rat, 105
Primary anorexia of aging, interleukin-1β, tumor necrosis factor α, plasma, cerebrospinal fluid, 145
Primary open-angle glaucoma, Arg-Gly-Asp, fibronectin, trabecular meshwork, immunostaining technique, morphometric analysis, 1
Protein kinase C, ACh-release and aging, acetylcholine, aging, 119
Protein-free diet, food restriction, aging, immune system, thymus, rats, 183
Proteoglycans, cartilage, osteoarthritis, aging hormones, growth factors, collagen, 213

Rat, prefrontal cortex, turnover, biogenic amines, ageing, 105
Rat liver, aging, gamma radiation, histones, regeneration, 37
Rats, protein-free diet, food restriction, aging, immune system, thymus, 183
Regeneration, aging, gamma radiation, histones, rat liver, 37
RHPA, sexual dimorphism, TIDA neuron, lactotrope, immunocytochemistry, densitometry, cell culture, 129

Selective ribosomal cistron regulation, *Allium cepa*, nucleolar morphology, ethylene, silver nitrate, cobalt chloride, senescence, 199
Senescence, *Allium cepa*, selective ribosomal cistron regulation, nucleolar morphology, ethylene, silver nitrate, cobalt chloride, 199
Sexual dimorphism, TIDA neuron, lactotrope, immunocytochemistry, densitometry, RHPA, cell culture, 129
Silver nitrate, *Allium cepa*, selective ribosomal cistron regulation, nucleolar morphology, ethylene, cobalt chloride, senescence, 199
Surface charge, erythrocyte, aging, free-flow electrophoresis, 97

Thiobarbituric acid, aging, food restriction, lipid peroxidation, lipid composition, 155

Thymic involution, adaptation to aging, immunological compromises, 49
Thymus, protein-free diet, food restriction, aging, immune system, rats, 183
TIDA neuron, sexual dimorphism, lactotrope, immunocytochemistry, densitometry, RHPA, cell culture, 129
Trabecular meshwork, Arg-Gly-Asp, fibronectin, primary open-angle glaucoma, immunostaining technique, morphometric analysis, 1
Tumor necrosis factor α, primary anorexia of aging, interleukin-1β, plasma, cerebrospinal fluid, 145
Turnover, prefrontal cortex, biogenic amines, ageing, rat, 105
